Dishwasher Safety ---------- Table of Contents ---------- * Dishwasher Safety * Quick Steps * Dishwasher Use * Cycle and Option Descriptions * Dishwasher Features * Dishwasher Care * Troubleshooting * Warranty Your safety is our top priority. Failure to follow all safety instructions can result in serious injury or death. The safety alert symbol indicates potential hazards that may cause harm. Important safety precautions for using a dishwasher: * Keep sharp items away from the door seal to avoid damage. * Place knives with handles up to prevent cut injuries when loading them. * Do not wash plastic items unless they're marked as "dishwasher safe" or consult the manufacturer's guidelines. * Refrain from touching the heating element during and after use, and ensure all enclosure panels are in place before operating the dishwasher. * Do not tamper with controls or abuse the door, lid, or dish racks. * Keep children away from the dishwasher to prevent injuries. Additionally: To prevent explosions, release any accumulated hydrogen gas by running hot water faucets for several minutes if the dishwasher hasn't been used in two weeks or more. gu2455xtsb gu2455xtsb
